Date 30-Dec-2020 التاريخ

**Dear Leather And Garments Sector,**

Due to the increasing number of people infected by COVID-19 inside the Kingdom, and due to the fact that we need to increase the prevention means and increase the personal protection, besides ensuring the transition prevention of the virus. It is important to inform you that the "Epidemiology Committee" will implement inspection for employees in the working factories in the coming days.

On the other hand, JCI praises the procedures followed by factories to reduce spreading the pandemic for the workers. But due to the fact of increasing the number of infected people, it is important from every individual to emphasis the procedures followed to prevent virus spreading and highly consider the manuals provided by health ministry and the business sustainability committee and supply chain.

JCI is looking forward from the industries to fully cooperate with the working Epidemiological investigation teams to implement the required COVID-19 examinations for factories workers.

It is wise mentioning that due to the high importance the local products and manufacturing has gained during this pandemic, It is important to ensure healthy personnel in factories in order to assure the continues spinning of the "productivity wheel". Thus, we emphasis the full cooperation with the working Epidemiological investigation teams.

**Regards,,,**

**Eng. Ehab Qadri**

**Board Member of Jordan Chamber of Industry  
Representative of the leather and Garments sector**
